

PROFESSIONAL STAGE CIGARETTE PROP SYSTEM

For Theater, Film, Television & Live Productions

Realistic smoking scenes • Professional performance • No compromises

DEVELOPED FOR PROFESSIONAL PRODUCTIONS

The Stage Cigarette Prop System has been developed exclusively for professional use in theater, film, television and live productions.

The reusable system provides a realistic visible smoking effect while eliminating many of the practical challenges associated with real cigarettes. It has become a trusted solution for productions requiring authentic smoking scenes during rehearsals, performances and filming.

Today, our products are used by theaters, film productions, opera companies, acting schools and other professional organizations across Europe, North America and Australia.

WHY CHOOSE STAGE PROPS?

- Realistic cigarette appearance
- Glowing cigarette tip during use
- Realistic visible smoking effect
- No ash
- No open flame
- Minimal odor
- Reliable and consistent performance
- Designed specifically for professional productions

THE SYSTEM

Designed for repeated professional use.:

- Rechargeable battery
- Replaceable filters
- USB charging equipment

The reusable battery connects to a replaceable filter and activates automatically during use, providing a realistic smoking effect without buttons or complicated operation.

PROFESSIONAL PERFORMANCE

The Stage Cigarette Prop System consists of:

- Approximately 200 uses per filter
- Automatic activation
- Consistent output
- Rechargeable battery
- Quick filter replacement
- Suitable for rehearsals and performances

FILTER COMPOSITION

Our replaceable filters contain only:

- Propylene Glycol (PG)
- Vegetable Glycerin (VG)

No nicotine • No tobacco • No flavorings • No colorings • No additional additives

TYPICAL APPLICATIONS

- Theater productions
- Film and TV production
- Acting Schools
- Opera productions
- TLive Productions
- Touring productions
- Stage training and education
